- **How to conduct research that gets published and noticed – a monthly series for postdocs**

Publishing one's research in a top tier journal is often the goal for both a postdoc and their PI. This accomplishment, first and foremost, requires innovative and groundbreaking research. Not to be overlooked though, are the steps and processes taken when conducting the research that eventually may lead to a high impact publication. In this monthly seminar series we will examine the research life cycle for a postdoc from research design best practices through considerations for getting a publication noticed. Throughout the series we will use the theme of publishing one's research to delve into topics related to conducting research with integrity. The series will run from the months of April through November occurring from 12-1 PM on the third Thursday of each month at CUMC with lunch provided. Further information about the entire series can be found at: <http://postdocseries.wikischolars.columbia.edu/home>

The third session of the series will be held on Thursday, June 18th from 12-1PM and will focus on clean data collection and resources from the libraries around data collection and analysis. This session will be led by Ashley Jester, Ph.D., the Data Services Coordinator in the Digital Social Sciences Center

The Postdoc handbook with policies and procedures around being a postdoc at Columbia, the OPA monthly events calendar, funding opportunities, as well as career resources with listings of groups to join, webpages to browse, and job search sites to utilize.
